📇 PROFILE

"My name is Leonardo Matos, an Architect transitioning to a Front-End Developer. Currently an Intern at Equantic Tech, I apply my experience with tools like AutoCAD, Revit, and Adobe Suite to create intuitive and functional web interfaces. I combine design and technology to deliver impactful digital solutions."

🎓 EDUCATION

Bachelor of Architecture and Urban Planning at UFRRJ.
https://portal.ufrrj.br/
2021 | Rio de janeiro, Brazil
My Architecture degree honed my design principles, problem-solving skills, and attention to detail. My experience with AutoCAD and Revit translates seamlessly to front-end development, where I focus on creating functional, user-centered, and visually appealing interfaces

💼 PROFESSIONAL EXPERIENCE

Equantic tech
Intern Front end developer
06/2024 – present | Porto, Portugal
My role as a Front-End Developer at Equantic involves building and maintaining web applications with modern tools like JavaScript, TypeScript, React, Next.js, and Material-UI. In my first IT position, I ensure that user interfaces are functional, visually appealing, and aligned with current web standards.

Lp representações Lda - Lusa souvenirs
Graphic design
06/2022 – 09/2022 | Porto, Portugal
At Lp Representações Lda - Lusa Souvenirs, I designed graphic materials, mockups, and souvenirs for Portugal's tourist cities using Illustrator and Photoshop. My work targeted souvenir shops across the country.

📚 COURSES

Full Stack JS Developer Course (50 hours) – React.JS-NoSQL - MongoDB - JavaScript - npm – Node.js.
CESAE Digital
04/2024 – 07/2024 | Porto, Portugal
Completed a 50-hour Full Stack Developer course covering JavaScript, React.js, Node.js, npm, and NoSQL with MongoDB. The final project involved building an API with Node.js and Express, using MongoDB as the database, and populating a site with data from the API.

Web Server Course Laravel/Php - Bootstrap . (30 hours). .
CESAE Digital
09/2023 – 11/2023 | Porto, Portugal
Completed a 30-hour course in Laravel/PHP and Bootstrap. Developed a CRM application for managing music bands, including features for band and album management, user authentication, and role-based access control.

Full Stack JavaScript Course (80 hours) – HTML- CSS – Javascript – React.JS – Next.JS – Node.JS -MongoDB – Shell – Git .
12/2022 – 04/2023
Completed an 80-hour Full Stack JavaScript course, mastering HTML, CSS, JavaScript, React.js, Next.js, Node.js, MongoDB, Shell, and Git. For the final project, I developed a full-featured web store, utilizing JavaScript for dynamic functionality, React.js and Next.js for building responsive, interactive user interfaces, Material-UI for design consistency, and MongoDB for efficient data management on the back end.
